

## Article Datasheet

Art.No.: 6284

### Article Description:

Material: Thermoplastic Elastomer (TPE)  
Reinforcement: NTS (No Torsion System) - twice  
Working Temperature: -30°C / +70°C

- thanks to the double NTS mesh, the hose offers a better strength and performance level, preventing the formation of knots and twists
- the inner and outer layers are both made of TPE material approved for food contact
- fully atoxic and pasticizer-free, its patented material is also recyclable, unlike other crosslinked elastomer materials
- hose for use with drinking water and other liquids for human consumption
- KTW-A and DVGW W270 certified
- EU Regulation 10/2011 (A-B-C-D1) certified
  
- field of application: food industries
